Hydrobiologia

The International Journal on Limnology and Marine Sciences

Contents

Volume 400

Distribution fields for aquatic ecosystem components: determination of significance of correlation zones
by I. Kalikhman 1–11

Influences of biotic and abiotic factors on seasonal succession of zooplankton in Hugo Reservoir, Oklahoma, U.S.A.
by W.C. Wolfinbarger 13–31

Diel changes in diet composition of an omnivorous cyprinid – a possible source of error in estimating food consumption
by J. Horppila 33–39

Food limitation, predation and allelopathy in a population of *Daphnia carinata*
by C.W. Burns & A. Dodds 41–53

Vertical distribution and abundance of invertebrates in two New Zealand stream beds: a freeze coring study
by S.C. Adkins & M.J. Winterbourn 55–62

Remote sensing and zonation of seagrasses and algae along the Kenyan coast
by F. Dahdouh-Guebas, E. Coppejans & D. Van Speybroeck 63–73

Bacterial ecology of a young equatorial hydroelectric reservoir (Petit Saut, French Guiana). Evidence of reduced compound exhaustion and bacterial community adaptation
by J.-F. Dumestre, A. Vaquer, P. Gosse, S. Richard & L. Labroue 75–83

Effects of genotype and environment on phenotypic variability in *Limnocythere inopinata* (Crustacea: Ostracoda)
by Y. Yin, W. Geiger & K. Martens 85–114

Evidence for zooplankton compensation and reduced fish growth in response to increased juvenile fish density
by J.M. Dettmers & D.H. Wahl 115–121

Processing of native and exotic leaf litter in two Idaho (U.S.A.) streams
by T.V. Royer, M.T. Monaghan & G.W. Minshall 123–128

Factors affecting food consumption and growth of walleye, *Stizostedion vitreum*, larvae in culture ponds
by T.A. Johnston 129–140

Need for restricting bivalve culture in the southern basin of the Lagoon of Venice
by Iu.I. Sorokin, O. Giovanardi, F. Pranovi & P. Iu. Sorokin 141–148

Biota contamination by PCBs and trace metals in the freshwater estuary of the River Seine (France)
by M. Blanchard, M.J. Teil, A.-M. Carru, B. Garban, D. Ollivon, A. Chesterikoff & M. Chevreuil 149–154

Fish communities and river alteration in the Seine Basin and nearby coastal streams
by J. Belliard, R. Berrebi dit Thomas & D. Monnier 155–166

The role of above- and below-ground components of *Spartina alterniflora* (Loisel) and detritus biomass in structuring macrobenthic associations of Paranaguá Bay (SE, Brazil)
by S.A. Netto & P.C. Lana 167–177
Mechanical abrasion and organic matter processing in an Iowa stream
by S.B. Heard, G.A. Schultz, C.B. Ogden & T.C. Griesel 179–186
Life cycle and secondary production of *Caenis luctuosa* (Ephemeroptera) in a semiarid stream (Southeast Spain)
by A. Perán, J. Velasco & A. Millán 187–194
The macroinvertebrate fauna of St. Lucia elucidated by canonical correspondence analysis
by T. Thorpe & B. Lloyd 195–203
Ascidioxynus ibericus n. sp. (Copepoda: Poecilostomatoida: Lichomolgidae), associated with the ascidian *Clavelina dellavallei* from the Strait of Gibraltar
by P.J. López-González, C. Megina & M. Conradi 205–210
Freshwater shrimps (Crustacea: Decapoda: Caridea) from the Xishuangbanna region of Yunnan Province, southern China
by Y. Cai & A.Y. Dai 211–241

Short communication
Phototoxicity of fluoranthene to two freshwater crustaceans, *Hyalella azteca* and *Daphnia magna*: measures of feeding inhibition as a toxicological endpoint
by A.C. Hatch & G.A. Burton Jr. 243–248

Errata 249, 251

Book reviews 253–261
